

INDEX

- AFGP, 245–247
AI hypothesis, 5, 15, 16, 17, 24
Anhydrobiosis, 95, 99, 100, 108, 109
Anomalous diffusion coefficients, 195
Anomalous viscosities, 186, 187, 195
Antifreeze glycoproteins, 245, 246, 248
Apolar-polar repulsion, 127, 131, 132, 135, 138, 140, 141, 144, 147
Association-induction hypothesis, 5, 15, 212
ATP synthase, 125–128, 133–135, 140–145, 232
Audio-frequency oscillator, 331
Autothixotropy of water, 299–300, 308, 309
- BET theory, 23, 45
Bioenergetics, 286–287
Biophysical implications, 212
Birefringence, 221–225
Blood coagulation, 329
Body consciousness, 232
Bound water, 226, 343
- Calcium-gated potassium channel, 147
Cell architecture, 253
Cell water, 1, 8, 18, 24
Characeae, 72
Clathrate cluster water theory, 320
Clusters of water molecules, 301, 303, 306, 308, 312, 318
Coagulation, 329, 331, 335–336
Coherence, 72, 75, 120, 222
Collagen, 223–224, 225–227, 228, 232
Complex III, 126, 134–135, 145, 147
Computer-recorded signals, 331, 334
Cytoplasmic streaming, 71–72, 77, 80
- Deionized water, 166–167, 300
Delayed luminescence, 228
Distilled water, 153
Donnan potential, 273–274
- Electronic excitation, 286, 288, 292, 293
Energy conversion, 126, 134, 288
- Enzyme kinetics, 211, 258
Eukaryotic cell, 204, 207, 260, 261, 265, 267, 319–320
Exclusion zone, 167, 170, 172–173
- Fluid Flow, 53, 57, 59, 343, 344
Fractal cytoplasm, 73, 75, 78, 88
Free radicals, 287–292
Free water, 226, 230, 254, 255, 257, 260, 348
- Gel phase transition, 121
Gibbs free energy, 127
Gibbs free energy for hydrophobic association, 129, 130, 131
Glass surface, 93
Glassy phase, 95, 102
Globular protein, 94, 100, 128, 134, 236, 237, 316, 318, 320–321
Glycosaminoglycans, 54, 55, 64, 342
Guinea pig heart, 334
- High density water, 118, 120, 259
Human neutrophil, 328, 331
Hydration, 19, 34, 126, 175, 189, 207, 230, 344, 345
Hydrodynamic radii, 212
Hydrophilic, 87, 108, 116, 166, 257–258, 261, 263
Hydrophilic surface, 102, 165, 318
Hydrophobic, 126, 127, 128, 130, 131, 133
Hydrophobic hydration, 126–127, 128, 131
Hysteresis, 210, 306
- Intercommunication, 223, 230–232
Interfaces, 176, 315
Interfacial water, 253
Intracellular water, 113
Inverse temperature transition, 128–130
- Kinesin, 126, 134–135, 145–147

Liquid crystalline continuum, 221, 232
 Long-range water structure, 166
 Low density water, 85, 114, 120, 259
 Lysozyme, 100, 102–103, 105–109, 349

Melting point, 156
 Memory of water, 326, 338
 Method of ball movement, 309
 Method of torsion oscillations, 308
 Model systems, 18, 24, 25, 33, 254
 MW dependence, 201
 Myosin II motor, 134–135, 144, 147

Nafion, 166–173
 Nano spaces, 260
 Non-freezing water, 341
 Nonlinear optics, 230

Oscillations, 84, 231, 294–295, 308
 Osmosis, 85

PAAc, 166, 167, 170–171
 Pentagonal water structure, 319
 Phase transition, 87, 121, 125, 128
 Photon emission, 293–294
 PM theory, 1, 17, 18, 19, 23, 24, 29, 33
 PMAA gel, 277–282
 Polarized multilayer theory, 18, 121, 316
 Polarized multilayered water adsorption, 316, 318
 Polarized multiplayer, 20
 Polarized oriented multilayer theory, 15, 18
 Polyelectrolyte hydrogels, 273
 Polyproline, 238–239, 240–241, 244, 248
 PPII, 237–239, 240–248
 Prokaryotic cell, 260, 261
 Protein conformation, 268, 287, 321–322
 Protein Hydration, 321

Protein machines, 126, 128, 131
 Protein Unfolding, 321
 Proton-conduction, 230–231

Rainbow worm, 221
 Reactive oxygen species, 289
 Reversed micelle, 254–257, 258–260, 263
 Rheology, 191
 Rieske Iron Protein, 134–135, 136–138, 145

Self-organization, 166, 294
 Shear rate, 176–177, 192, 202, 206–209, 211–212
 Shear rate effects, 205
 Silver chloride crystals, 169
 Solute exclusion, 33, 36, 165, 167
 Sources of variability, 196
 Specific electrical conductivity, 158
 Standing water, 300, 308, 310–311
 Structured water, 87–89, 126–127, 286–287, 319
 Sulfation, 55–56, 65
 Super-cooling, 102, 121, 246
 Surface potential, 172

Temporomandibular disk, 53
 Thermal anomalies, 176, 178, 179–180, 182–184, 186, 189, 191–196, 200
 Thermal capacity, 156

Unfolded protein, 236

Valence angle, 152–153, 158
 Vapor pressure, 2, 21, 25
 Vicinal hydration, 175, 189, 207
 Vicinal water, 81, 85, 176, 182, 210

Water, 1, 85
 Water cluster, 84, 115–116, 118, 120, 122, 178, 319–320
 Water structure, 152
 Water structuring, 117, 118, 120
